

Faros™

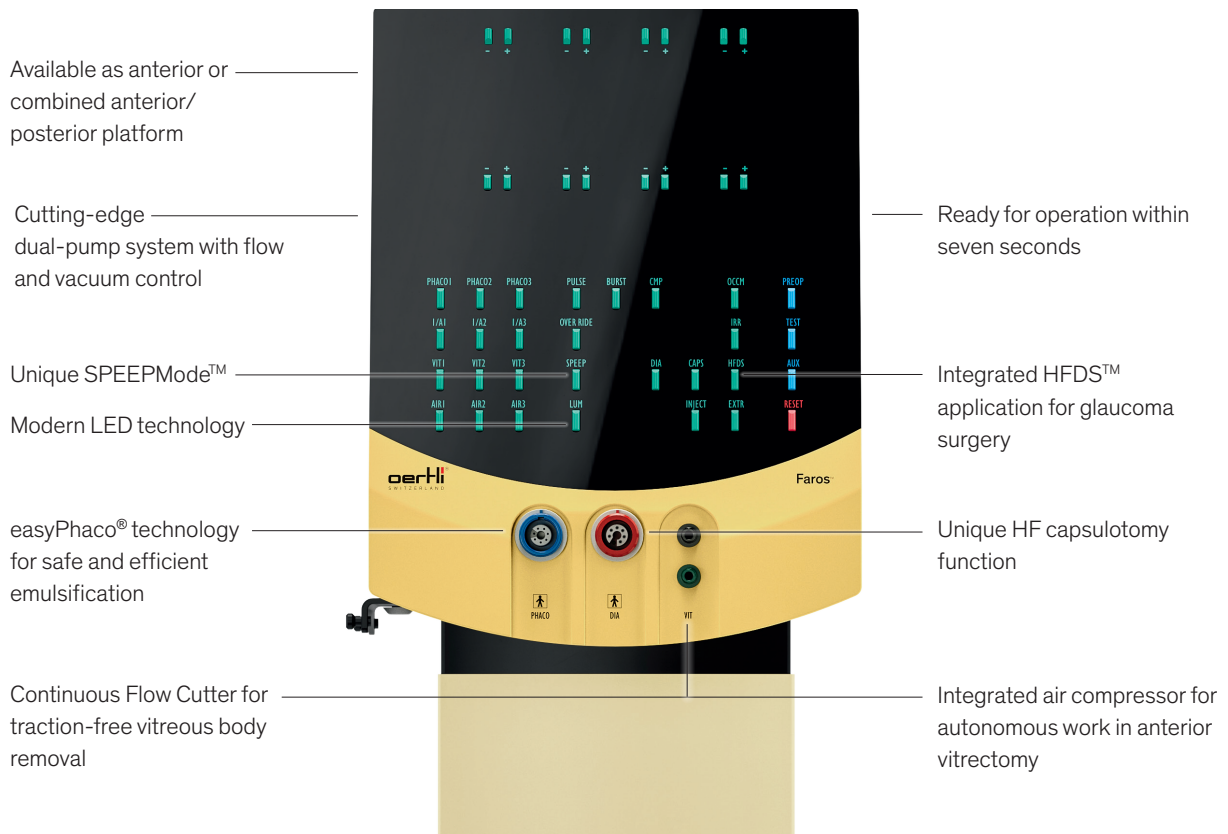

MAKING THE
DIFFERENCE
WITH THE
NEW FAROS

New Features and Benefits

- Unique SPEEPMode™ ensures highly precise maneuvers
- The integrated air compressor allows an autonomous anterior vitrectomy
- Simplified cassette installation for a fast machine set up
- All connections accessible from the front to speed up the OR set up
- Optimized cutter control for an increased cutting force, providing smoother work conditions in the posterior segment
- Switching between programmes with the pedal while aspirating or phacoemulsifying supports a quick work flow
- Phaco time display in I/A for easy readout during the entire surgery
- Lightweight pedal without compromising on robustness

NEW FAROS - ALL ADVANTAGES AT A GLANCE
